Horizon inks distribution agreement with Sedecal

MISSISSAUGA, Ont. – Larry Riley (pictured on left), President and CEO of Horizon Medical Services, and S. Manuel Martinez Garcia (pictured on right), Chief Executive Officer of Sedecal, of Spain, have announced an agreement that allows Horizon to act as the Original Equipment Manufacturer of Sedecal products for the Canadian market.

“After more than 15 years of selling and distributing Sedecal products in Canada, we felt that we needed to take the next step to being an OEM for their products here,” said Riley. “Thanks to our decision to obtain ISO 13485 certification last year, we are in a unique position in this country to be listed as the ‘Manufacturer of Record’ for any Health Canada licensing requirements. We believe that this is a first for a Canadian independent imaging company,” continued Riley.

“Sedecal is very excited to collaborate on Horizon’s commitment to success in such a sophisticated market as Canada,” said Martinez. (Pictured: Larry Riley of Horizon Medical and Manolo Martinez of Sedecal sign agreement.)

Canadian-owned and operated, Horizon Medical Services specializes in developing comprehensive diagnostic solutions for hospital and clinic environments throughout North America. They market advanced technology for a diverse range of modalities, including digital X-ray, nuclear medicine, ultrasound, CT, and MRI applications. In keeping pace with an ever-changing medical field, they offer the advantage of customized, integrated solutions composed of premium equipment and software from multiple vendors. Their customers value them as a trusted, single-source partner. For more information, see www.horizonmedical.com.

Sedecal, a Spanish company founded in 1994, has had continuous growth to become today a worldwide leader in OEM design and manufacturing of high frequency X-ray generators and X-ray systems.
